

Special Blood Donation for Special Patients

NMG: New Milestone Goal for the New Millennium Group

Do you know anyone who has ever been in an auto accident?
Do you know anyone who has had cancer?

An apheresis donation is a special blood donation that allows you to give part of your blood--either platelets or plasma--to help meet the needs of leukemia, cancer, and bone marrow patients, as well as accident and burn victims. In order to donate apheresis, one needs to be in good health, must be at least 17 years old and weigh at least 110 pounds. In the time that it takes to watch a favorite movie, you can help save a life.

- Convenient downtown location at Delaware and Summer Avenues
- Scheduled appointments to fit your schedule
- Delaware Center open seven days per week with early and late hours for early-risers and late-comers alike
- Great, friendly staff
